# Birding Tips:

1. Bring along a field guide for reference.
2. Be quiet and avoid sudden movement that may startle birds.
3. Avoid brightly coloured clothes that will enhance the appearance of movement.
4. Listen closely and follow the calls. Following a single calling bird will often lead you to a larger feeding flock.
5. Consider sharing your sightings through a local monitoring program to contribute to conservation actions. For a list of programs visit:
